

Journal of Statistical Physics accepts original and review papers in the fields of statistical mechanics and thermodynamics of equilibrium and nonequilibrium processes. Papers on plasma physics, nonlinear dynamics, biology, stochastic processes, fluid dynamics, and chemical physics are also accepted provided they are of general interest in relating macroscopic behavior to microscopic interactions.

General criteria for contributions are as follows. Papers should present important new results, and review papers should provide new insights. Clarity of presentation is important in all cases but, in many cases, particularly for review papers, it is the decisive criterion for publication. Each paper should be written in such a way that a clear understanding of the problem and of the results can be obtained from the abstract and introduction. Given that a paper meets these criteria, shorter papers are greatly preferred to longer ones. In summary, the journal publishes papers with important new results or insights written clearly and concisely.

The journal also accepts communications in the following departments: news of meetings, questions and answers, book reviews, and letters to the editor.

EDITOR-IN-CHIEF

L. Lebowitz, Department of Mathematics, Rutgers University, New Brunswick, New Jersey

ASSISTANT TO THE EDITOR

D. Williamson, Department of Mathematics, Rutgers University, New Brunswick, New Jersey

EDITORIAL BOARD

Israel Aizenman, Rutgers University, New Brunswick, New Jersey
 R. M. Deutch, Massachusetts Institute of Technology, Cambridge, Massachusetts
 J.-Pierre Eckmann, University of Geneva, Geneva, Switzerland
 H. Ernst, University of Utrecht, Utrecht, The Netherlands
 J. Hell Feigenbaum, Los Alamos National Laboratory, Los Alamos, New Mexico
 S. Garcia-Colin, Universidad Autonoma Metropolitana, Mexico City, Mexico
 J. Goldstone, Rutgers University, New Brunswick, New Jersey
 R. B. Griffiths, Carnegie-Mellon University, Pittsburgh, Pennsylvania
 J. Gruber, Laboratoire Physique Théorique, Lausanne, Switzerland
 J.-Pierre Hansen, Laboratoire de Physique Théorique des Liquides, Paris Cedex, France
 J. H. Kalos, New York University, New York, New York
 J. H. Lieb, Princeton University, Princeton, New Jersey
 Y. Mori, Kyushu University, Fukuoka, Japan
 J. L. Newman, University of Arizona, Tucson, Arizona
 P. Nicole, Université Libre de Bruxelles, Bruxelles, Belgium
 G. Presutti, Università di Roma, Roma, Italy
 J. Reiss, University of California, Los Angeles, California
 R. S. Schulman, Technion, Haifa, Israel
 L. G. Sinai, Landau Institute of Theoretical Physics, Moscow, USSR
 J. Souillard, Centre de Physique Théorique, Palaiseau, France
 J. S. Spencer, New York University, New York, New York
 J. Spohn, Rutgers University, New Brunswick, New Jersey
 J. Stauder, Institut für Theoretische Physik, Köln, West Germany
 J. J. Stephen, Rutgers University, New Brunswick, New Jersey
 J. H. Weiss, National Institutes of Health, Bethesda, Maryland
 J. Widom, Cornell University, Ithaca, New York
